Your ScanPro 2000 uses graphic buttons with customizable text and tool tips to provide a tool bar with controls that make working with microfilm easy, efficient and fun. These button controls are arranged under tabs to keep the number of buttons to an absolute minimum while still providing access to all of the powerful features available on your ScanPro 2000. The tool bar is customizable by the administrator, so the buttons and their order may be different than what is shown on this Quick Start guide. This guide is meant to get you started, for more information, "mouse over" a button or CLICK the Help button plus any button on the tool bar.

Home	Adjust	File	Setup

CLICK a TAB to see the button controls that are available.

Film Selection Wizard — **Film Wizard** CLICK to return to the start screen that shows graphic icons of different film types. CLICK on the icon that matches your film type to set up the scanner for that film.
